Introduction

The index includes the name of the person, age if given, township or city in which the person lived and page number of the microfilm on which the name appeared. The names are alphabetized as to surname and given name. The page number is located on the upper right side of the microfilm page. Each page has a A & B.

Keep in mind that some census takers spelled a name as it sounded. Try using a phonetic spelling if you cannot find a name you are looking for.

Brackets are used when a change or correction was added. On page 1 of the book, the first few names were unreadable and question marks used.

Townships on microfilm are listed alphabetically with page numbers and letter A & B used. On the microfilm, Harrison Twp. first shown is 3A and 3B page 3 and then 1A page 1 to 11A page 11. I would say there was a mistake when the census was being microfilmed.

Following are the township, township abbreviation and then page numbers:

Although this has been proofread several times, doing a project of this magnitude, mistakes are inevitable. Monty Orsbon has been a tremendous help in the proofreading and researching for the correct letters in names. With her input this project has been a more complete success. Monty has corrected the last names of people where the census takers had entered the wrong last names. Those names are in brackets as the census is a Federal document and cannot be changed.

The people on this census are more than names, ages and occupations. They are people who helped to make this county what it is today in 2009. A great place to live, work, play and raise families. They had dreams and hopes and worked hard to make them come true. When you are finding your relatives, this is something to think about. We can appreciate them for what they have done to make our lives easier.
